TAP-N-GO TRIMMER HEADS #11221

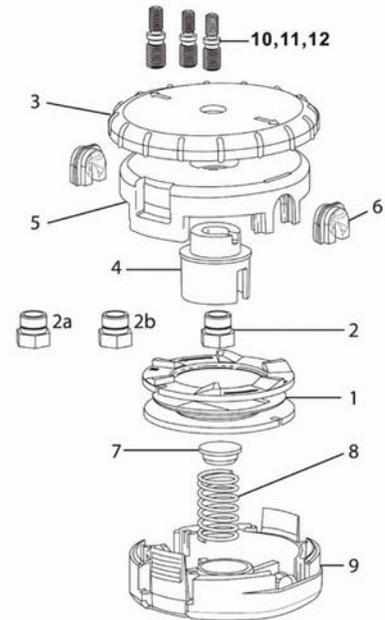

Line tensioning system with split spool reduces head vibration.

Smooth and durable, the large bottom cover taps on ground to advance line and allows head to glide while trimming

Large durable eyelets enhance line life.

Trimmer head is pre-wound with .095 inch (2.4mm) Helicoidal trimmer line.

Fits most straight shaft trimmers and brushcutters.

RELOAD TRIMMER LINE IN 3 EASY STEPS

Step 1:
Align arrow on knob with eyelet.

knob
eyelet

Step 2:
Feed approximately 12' of trimmer line through eyelet.

Step 3:
Reload by simply turning large knob on top of trimmer head and cutting line to equal lengths.

TAP-N-GO TRIMMER HEADS #11210

Heavy-duty, tap-and-go string trimmer head. A metal insert in the nylon tap knob extends the head's life by reducing wear and abrasion to the nylon. The tap knob also has a "stay-on" spring, so users never have to crawl around in the grass looking for a spring that popped out. Two split spools make refilling easy and reduce the chance of twining or welding. The eyelet through which the line is threaded is made of aluminum for longer life, and it is replaceable for easy servicing and lower operating costs.

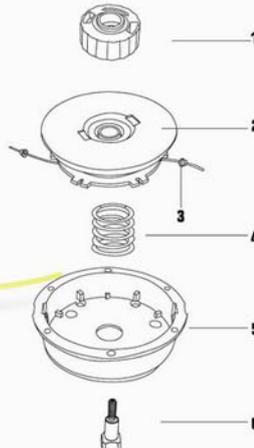

Spare parts

UNIVERSAL AUTO Matic FEED TRIMMER HEAD #11223

Profile

Welcome to Greenworld trimmer line, a market leader in China trimmer line industry. We are specialized in the manufacture of nylon trimmer line and other mono filaments, with 10 extrusion lines for producing nylon trimmer line and other mono filaments, and we can widely supply a complete scope of nylon monofilaments, and polyester monofilaments for trimmer line, builders line, industrial fabrics, nylon zipper etc.

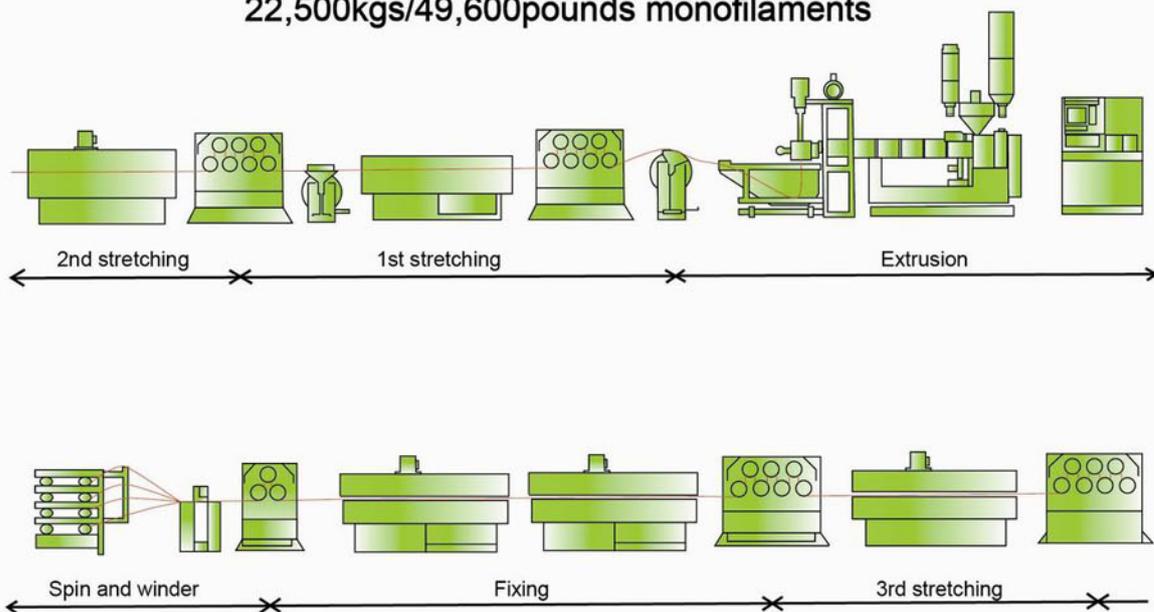

***100% Virgin raw material and no compromises on the batch quality**

All of our products are extruded from a lend raw materials and additives

Sourced in three stringent specifications

Through tests are performed on each and evry batch

10 Extrusion lines for daily capacity
 22,500kgs/49,600pounds monofilaments

Attention: Any monofilament line can lose moisture over tinme or become brittle, especially if subjected to heat and sunlight. To reduce brittleness, We strongly suggest that line be subnerger in water for 12 hours.

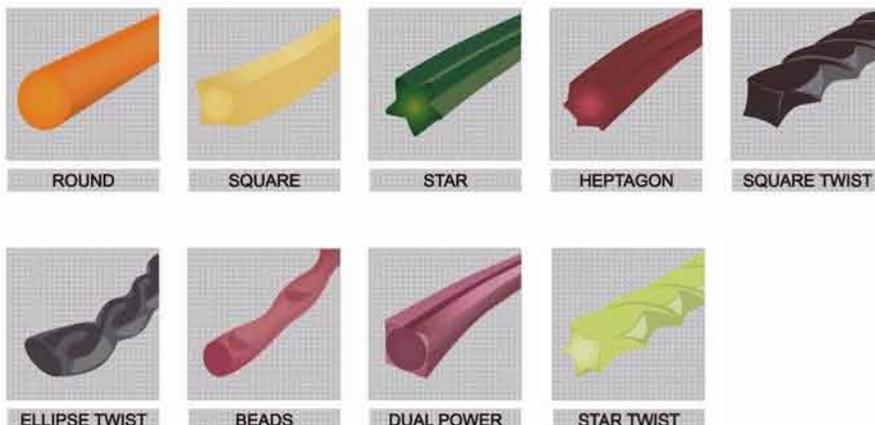

How to choose the right trimmer line type you need?

Available shape of trimmer line

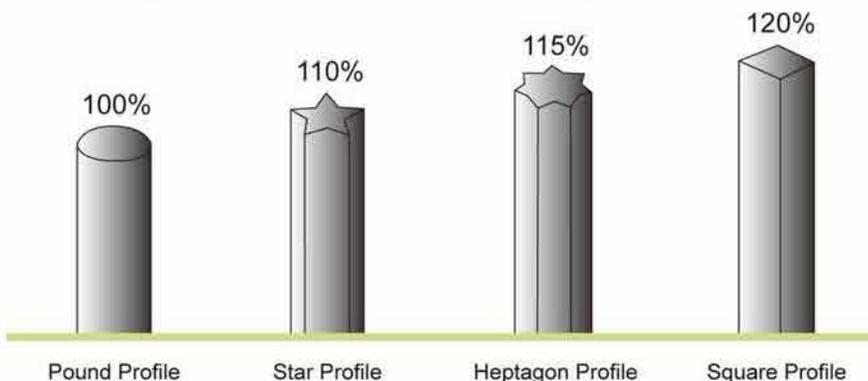

Available different shape for cutting performance

* Trigon, Square, diamond, star, hexagon, heptagon shapes for more blades to get better cutting performance.

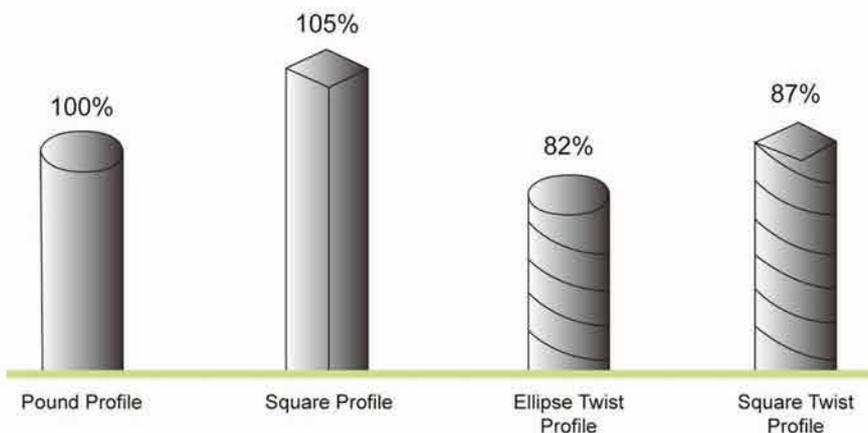

* Round shape for universal cutting performance

Cutting performance of different shaped trimmer line

Sound power level of different shaped trimmer line dB(A)

Attention: Any monofilament line can lose moisture over time or become brittle, especially if subjected to heat and sunlight. To reduce brittleness, We strongly suggest that line be submerged in water for 12 hours.

Available size of trimmer line:

1.30mm/.050", 1.65mm/.065", 2.00mm/.080", 2.40mm/.095", 2.65mm/.105", 3.00mm/.120", 3.30mm/.130", 3.50mm/.140", 4.0mm/.155"

Available Quality of trimmer line: Economic/Commercial/Professional/Ultra-Pro Grade

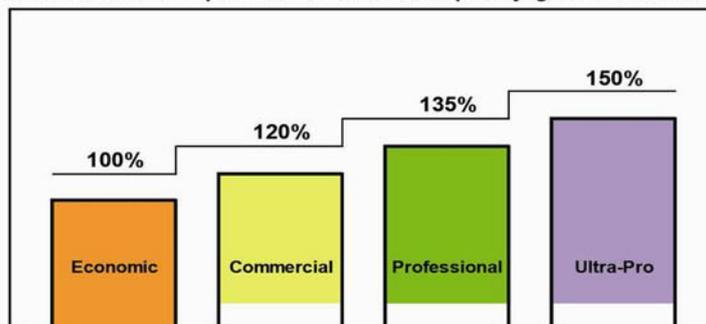

Available in different quality grade:

- * Economical grade for normal cutting performance
- * Commercial grade for better cutting performance
- * Professional grade / Ultra-Pro grade for best cutting performance.

- * Blister dount packing: the universal, nice package for 10-20m, 1/2lb, 1lb trimmer line.
- * Spool packing: reasonable for packing 3lb,5lb,10lb trimmer line.

Attention: Any monofilament line can lose moisture over time or become brittle, especially if subjected to heat and sunlight. To reduce brittleness, We strongly suggest that line be submerged in water for 12 hours.
